Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, 47-57, drawn to a first thermal management system for a battery, classified in class 429, subclass 120.
 - II. Claims 22-46, drawn to a second thermal management system for a battery, classified in class 429, subclass 72.
2. The inventions are distinct, each from the other because of the following reasons: Group II requires a plurality of thermal jackets, which limitation is not part of the Group I first thermal management system for a battery. In addition, Group I recites a duct defining a single flow path contacting some of the cells in a serial manner, which recitation does not form part of the Group II thermal management system.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Allison M. Bowles Tulino on January 12, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1745

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
